

Assignment

Inlämnas senast 31 januari kl.18.00

Denna är betygsgrundande (men inga poäng kommer att synas)

Det är OK att göra detta i grupp men komihåg att varje person måste skicka in sitt eget assignment för bedömning.

Read about Disaster and Recovery

Read about Web Apps in Azure

Om ni inte kan göra detta fysiskt i Azure så berätta i textform hur ni skulle göra i Azure.

1. Describe (in own words) how you can setup a Web App and how you can edit in the HTML code **without** GITHUB and **without** using publish in Azure. But using Visual Studio Code.
2. Show with Network Watcher topology all your implementation in Azure (vNet, VMs and maybe more).
3. Answer the questions below (in your own words)
 - a. What is RTO in Azure backup
 - b. What is RPO in Azure backup
 - c. What is Retention?
 - d. How can we use IP-Flow, test Connection with Network Watcher (Show with screen dumps)
 - e. Describe difference between Crash Consistent and Application Consistent
 - f. Describe the difference between Web App Service and IIS in a VM that is (installed in Azure) with Server 2022. The difference in what we need to do in the VM (IIS) and Web App Services respectively.
